Location: Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Site Reliability Engineer with 5 years of experience building reliable, observable, and scalable infrastructure. Expert in Kubernetes, monitoring systems, and incident management.

SKILLS

Languages: Python, Go, Bash, SQL

Infrastructure: Kubernetes, Docker, Terraform, Ansible, Helm

Monitoring: Prometheus, Grafana, Datadog, ELK Stack, PagerDuty

Cloud: AWS (EKS, EC2, RDS, CloudWatch), GCP

SRE Practices: SLOs/SLIs, Error Budgets, Chaos Engineering, Runbooks

Tools: Git, Vault, Consul, Istio, ArgoCD

WORK EXPERIENCE

Senior SRE — Atlassian India, Bangalore, Karnataka

Apr 2022 – Present

- Managed Kubernetes clusters serving 10M+ daily active users
- Built SLO monitoring platform using Prometheus and custom Go exporter
- Led chaos engineering program using Litmus and Chaos Monkey
- Reduced MTTR from 45 min to 12 min through improved runbooks and automation
- Designed multi-region failover architecture for critical services

SRE — Shopify India, Bangalore, Karnataka

Jan 2020 – Mar 2022

- Implemented observability stack (logs, metrics, traces) using ELK and Jaeger
- Built auto-scaling policies reducing infrastructure costs by 25%
- Developed incident response automation using PagerDuty and Python
- Maintained 99.99% uptime for payment processing services

Junior DevOps Engineer — Cognizant, Chennai, Tamil Nadu

Jun 2018 – Dec 2019

- Managed CI/CD pipelines for Java microservices using Jenkins
- Automated infrastructure provisioning using Ansible and Terraform
- Monitored application health using Nagios and Grafana

EDUCATION

B.Tech Computer Science — CEG, Anna University, Chennai (2018)

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- AWS Certified SysOps Administrator – Associate
