LinkedIn: [linkedin.com/in/pallavihegde](https://www.linkedin.com/in/pallavihegde) | GitHub: github.com/pallavihegde

Location: Bangalore, Karnataka

PROFESSIONAL SUMMARY

Computer Vision Engineer with 4 years of experience building production vision systems using deep learning. Expert in Python, PyTorch, and deploying models on edge devices.

SKILLS

Languages: Python, C++, CUDA

ML/CV: PyTorch, OpenCV, TensorFlow, YOLO, SAM, Detectron2

Deep Learning: CNNs, Transformers (ViT), GANs, Object Detection, Segmentation

Edge: TensorRT, ONNX, OpenVINO, NVIDIA Jetson, Coral TPU

Cloud: AWS (SageMaker, EC2 GPU), GCP (Vertex AI)

Tools: Git, Docker, MLflow, Label Studio, DVC

WORK EXPERIENCE

Senior CV Engineer — Ather Energy, Bangalore, Karnataka

Aug 2022 – Present

- Built real-time object detection system for autonomous scooter using YOLO v8
- Deployed PyTorch models on NVIDIA Jetson achieving 30 FPS inference
- Developed data labeling pipeline processing 100K+ images using Label Studio
- Implemented model compression (pruning + quantization) reducing size by 70%
- Created synthetic data generation pipeline using GANs for rare scenarios

Computer Vision Engineer — Qualcomm India, Hyderabad, Telangana

Jun 2020 – Jul 2022

- Developed face recognition system for mobile SoC using TensorRT
- Built image segmentation pipeline for medical imaging applications
- Optimized CNN inference on Snapdragon neural processing engine
- Published internal paper on efficient vision transformer architectures

EDUCATION

M.Tech Computer Vision — IIIT Hyderabad (2020)

B.Tech Computer Science — RV College of Engineering, Bangalore (2018)
